Pre – Zonal Workshop Review Meeting at NDUAT, Faizabad 18-19 July, 2017

Pre zonal workshop review meeting of KVKs working under area jurisdiction of NDUAT, Faizabad was organized at Directorate of Extension, NDUAT, Faizabad during 18-19 July, 2017. In the beginning, Dr. S.P. Singh, Director Extension, NDUAT, Faizabad welcomed all the dignitaries and participants. In this review meeting, 17 KVKs under area jurisdiction of NDUAT participated and made presentation on annual progress report and annual action plan of KVK. In introductory remarks, Dr. S.P. Singh, Director Extension expressed that KVKs should focus on technology assessment and act as knowledge and resource centre in the district. He said that the Programme Coordinator (PC) should develop a brief presentation on major problems, priorities and existing scenario related to market; weather; input support; area, production & productivity related data on major crops; significant achievements of KVK highlighting important successful cases of the district and use this at different forums to sensitize different stakeholders. The PC is expected to guide and advise the extension machinery of the district. Use of agro-advisory service through v-KVK should be emphasized to enhance the reach of KVKs to farmers. Infrastructure, resources, soil testing lab, farmer's hostel, residential quarters, etc. of KVKs may be utilized to its full potential. Representation of NGOs, gram panchayat, anganwadi kendras, input dealers, etc. may be considered for training under extension functionaries. KVK has to establish its outreach and recognition in the district by technology dissemination and awareness creation programmes. Revolving fund may be utilized for instructional farm development. In eastern Uttar Pradesh, resource conservation technologies like zero tillage, raised bed, leaf colour chart, land laser leveller, drum seeder, system of rice intensification, etc. need to be further emphasized by the KVKs. He further stressed that in Eastern Uttar Pradesh major attention on usar land, flood prone areas, drainage system management, diversification of agriculture, etc. may be given. Each KVK should identify at least 10 farm innovators in the district. Unique indigenous material may be provided to the NBPGR, New Delhi for germplasm conservation & farmers rights over plant varieties may be taken care of. Technical feedback from KVK to the research system must be given top priority and its record should be maintained. Work on paddy, banana and other commodity based integrated farming system models should be developed. Interventions on making the rice-wheat system a more profitable system may be pursued. Focus on processing and value addition like banana fibre extraction may be given by developing entrepreneurs. The KVK should have a good technology cafeteria for educating the farmers. Special days like Agriculture Education Day, Farm Innovators Day, Foundation Day and Agri-Industry Day may be celebrated each year by each KVK.

Dr. Bhagwan Singh, Director Research of NDUAT, the Chairman of the Inaugural Session advocated that KVK should work as a team for addressing problematic areas. Development of innovative extension methodologies/approaches is the major role of KVK. Mobile technology has made its reach in the rural areas, it may be utilized by the KVKs for faster technology dissemination. KVK should have material, appropriate technology, tested methodology and information support for benefiting the farmers of the district. Effect of training on farmers & entrepreneurs may be studied. The delivery and work of KVKs need to be enhanced commensurate to fund allocation & expectation. Monitoring, guidance and technological backstopping at SAU level are needed for effective functioning of KVKs. Technological backstopping by the concerned State Agricultural University should be extended for the KVKs including NGO & other KVKs. The Programme Coordinator should

Attested
ASD
Director Extension
A.N.D.U.A.T. Kumarganj
Ayodhya

have ability to coordinate, guide, advise, harmonize and facilitate all the staff of the KVK for effective functioning. He should develop a mechanism of creating transparency involving all in the KVK activities. Dr. Singh advised to adopt paddy variety Swarna Sub-1 in flood prone areas, integrated farming system, etc. He said technical feedback to the research system will make a difference in technology development.

A team of experts of Directorate of Extension reviewed the progress and action plan of 17 KVKs. The important observations recorded during presentation are as under, which may be included in the Progress Report 2016-17 and Action Plan 2018-19 by all the KVKs as reference of the technology for the district:

- Focus on Rabi maize, fisheries, resource conservation technologies, perennial grasses, fodder crops, etc. may be given.
- Each SMS should conduct at least one On Farm Trial in each season. Twelve OFTs may be planned by each KVK. The Programme Coordinator should also conduct front line demonstrations and On Farm Trials.
- For latest cultivar and technologies of pulses, the KVKs should contact the IIPR, Kanpur for getting seed & technology and for other commodities, the concerned Agricultural Universities/ICAR institutes may be approached.
- SMS (Home Science) should give more focus on drudgery reduction, nutritional garden and economic development in the villages. A model nutrition garden should be developed at the KVK also.
- Enterprises for land less farmers should be planned including poultry, goatery, bee keeping, mushroom cultivation, etc. Villages having more than 30% tribals may be adopted by the KVKs specially Sonbhadra, Balrampur, Maharajganj, Gonda, Bahraich and others.
- Problem cause analysis should be done by the KVKs to design the realistic on farm trials. Common On Farm Trials on Swarna Sub-1, Chiran Sub 1, Sambha Sub-1 in flash flood areas may be developed by the KVKs of eastern Uttar Pradesh.
- Usar Dhan-3, CSR-36, CSR-43 cultivars of paddy may be promoted in usar affected areas by all the affected KVKs.
- On Farm Trial on Kala Namak-3 paddy variety may be planned by KVKs (Bahraich, Chandauli, Basti, Maharajganj, Balrampur, Gorakhpur, Kushi Nagar, Deoria).
- Kashi Uday cultivar of vegetable pea in place of Arkel may be promoted.
- Activities on minor millets may be planned by KVK Sonbhadra and Mirzapur and related crop cafeteria may be developed at the KVK.
- Fund flow from host organisation to KVK should be smoothened so that activities may be organised at appropriate time.
- Critical monitoring and facilitation from Directorate of Extension is essentially required to make the KVKs more vibrant.

**Revised Proceeding of the Mid Term Review Meeting at NDU&T, Faizabad
during 14-15 December, 2017.**

The meeting of Mid Term Review was held on 14-15 December, 2017 at Directorate of Extension, NDU&T Faizabad. In this Review Meeting Dr. Akhtar Haseeb, Honourable Vice Chancellor, NDU&T, Faizabad was Chief Guest; Dr. Atar Singh, PS (Agronomy), Chaired the Mid Term Review meeting; other officials of NDU&T such as Extension; Dr. S.P. Singh, DE; Dr. Bhagwan Singh, Director Research; Dr. R.R. Singh; Dr. S.K. Singh, Head KVK Sonbhadra; Dr. S.K. Tomar Head KVK Siddhartha Nagar; Head of Division of NDU&T Faizabad were present. The Agenda and welcome address was given by Director Extension to the participating members of the Mid Term Review meeting and Head KVKs. There were 24 Head of KVK were present out of which 17 from NDU&T, Faizabad and 7 KVKs of ICAR, NGOs, and Educational Institutes of Area Jurisdiction of NDU&T, Faizabad. Thereafter, the agenda items were discussed and following recommendations were made.

Dr. Akhtar Haseeb given remarks during the Mid Term Review Meeting that those who are coming late in the Review Meeting they must be issued a notice from the Director of Extension side. He was in the opinion that why AUCs have not given to the ICAR-ATARI Kanpur? He narrated that KVK is assessor not evaluator. He further said that Director Extension is intended to PCs for money must be given. Regarding input and *chittha* should be submitted by 7th of every month by all the PCs and DE. They are visiting regularly to the University officially but why file is not moving? He showed his displeasure that 29 files Xerox copy is with me some of the specific KVKs identified. He was in the opinion that Directorate is not working. He said many centers having problem of Electricity, Vehicle & staff they must work accordingly. KVK Basti should prepare for National Award as well as Zonal Award and other centers should also come forward for the submission of Award application.

Honorable VC said KVK reviewed again and he should know the progress made by the KVKs. It has been planned that Honourable VC starting writing CR of the KVK Persons. They must have one page summary of all the Scientist, Senior Scientist & Head and DE for CR. DE should put coordinated effort as per duty, coordinate and take the work and provide the facility to the KVKs delivery system such as ICAR, University should be strengthened. He warned that in future a preparatory meeting should be planned and held at Directorate of Extension level and a summary report should be submitted to the VC office a week before, purpose is that by discussion for utilizing the best. The Honourable VC urged to all the Head of KVKs to purchase GPS device and Camera for keeping proper information and records.

In the beginning Director Extension, Dr. S.P. Singh welcome to the participating scientists and dignitaries and presented the agenda items for the Midterm review meeting regarding work done past six month and development of Annual Action Plan for 2018-19. He said that there is 32 vacant posts in 17 KVK of NDU&T, Faizabad.

Director Extension

Dr. Atar Singh, Principal Scientist (Agronomy), ICAR-ATARI, Kanpur given the remarks on expected results based on work done and future Action Plan. He highlighted some of the issues for better functioning of the KVKs and the other activities to be carried out as per the Direction of the Division of Agriculture Extension ICAR-New Delhi.

In the beginning of the meeting some important issues raised by Dr. Atar Singh, PS, ICAR-ATARI, Kanpur.

1. One page summary – Target & Achievement with short fall reasons.
2. Action Plan, summary table of targets.
3. Separate Action plan for Home Science should be included in Action Plan.
4. Animal Science OFT proposed are common to all as per discussed in review meeting should incorporate in Action Plan.
5. 3000 target of Soil Sample – Status and develop 10000 soil health cards.
6. Development of 250 soil Health Card, impact study for saving fertilizer and money as different districts.
7. Latest staff position at KVKs should be given to ICAR-ATARI, Kanpur.
8. 5 technologies provided by KVK is incomplete, this may be edited by the Head of KVK and resubmit at the earliest.
9. Inclusion of Hydroponics technology in Action plan for Urban & semi urban KVKs.
10. Mini soil testing labs given to 45 KVKs & remaining 36 new proposed.
11. Earnet services stopped therefore, budget may be available for net etc. rupees up to 1000/-
12. Expenditure & Utilization of Budget – should locked out – AUCs.
13. Best Awardee KVK put on website & submission of award application by 26 December, 2017 for the purpose a meeting will be called on 15 January, 2018 at ICAR-ATARI, Kanpur.
14. Impact study of adopted village changes last 6 years in 2 times (3 year basis), changes may, outcome production, sustainability, water table, Social Impact and economical etc.
15. Every year 05th December will be observed as World Soil Health Day.
16. Jai Kisan & Jai Vigyan will be observed during 23-29 Dec., 2017 and celebrated as a technological week.
17. 16-31 Oct, 2018 will be observed as Swachhata Abhiyan by KVKs
18. Registration of farmers at Kisan portal of Govt. of India.
19. KVK should collect the list of 5000 farmer family and Database for Publication.
20. IFS Model proposed have been approved for 14 KVKs.
21. We are planning to provide fund for functioning ATIC such as Rs. 5 Lakh for functioning one time grant Rs. 2 Lakh for every year.
22. Training hall should be busy by KVK and made inventory & training should be 200 hours & 60 hours report should be to ASCI (Agricultural Skill Council of India).
23. KVK Impact assessment worked out at National basis.

“Role of KVKs in Doubling Farmers Income”

A workshop was conducted to evaluate the performance of KVKs in doubling farmers' income, by Directorate Extension, Acharya Narendra Deva University of Agriculture & Technology, Kumarganj, Ayodhya under the Chairmanship of **Dr. J. S. Sandhu**, Hon'ble Vice Chancellor, ANDUAT, Ayodhya on 18th August, 2018. At the outset, **Prof. A. P. Rao**, Director Extension, Directorate of Extension, ANDUAT welcomed Vice Chancellor, Nodal Officer (KVKs), all Senior Scientists & Heads and SMSs present at the workshop. **Dr. J. S. Sandhu**, in his remarks, congratulated all Senior Scientists & Heads and staffs of the KVKs for their excellent performance in doubling farmers' income. He emphasized the KVKs to give special importance on conduction of DFI projects since the programme is being monitored by highest authority. He briefed about the objectives of the workshop and outlined the manner in which it was going to be conducted. He mentioned about the seven points strategy for doubling the farmers' income by 2022. He also stressed upon the convergence level with different line departments to achieve the desired goal of doubling the farmers' income. During the workshop all the Sr. Scientist & Heads of Krishi Vigyan Kendra of ANDUAT gave the presentation regarding the baseline survey and the already disseminated technologies in their respective adopted village for the doubling the farmers' income by 2022. Finally the workshop concluded with recommendation from the different stake holders. The house suggested preparation of intervention wise and year wise module for individual household. The workshop ended with a vote of thanks by Dr. R. R. Singh, Professor, Soil Science, Directorate of Extension. Total 27 participants were participated in this programme.

Why we celebrate Fish Farmers' Day

The National Fish Farmers's Day is celebrated to commemorate **Dr. Hiralal Chaudhury** and **Dr. K.H. Alikunhi** for their contribution in achieving the successful induced breeding of Indian Major Carps on 10th July, 1957 at Angul in Odisha for the first time in country.

Who can attend?

The training programme can be attended by

- (a) Students
- (b) Technical and Non- technical staff
- (c) Fish Farmers

Themes of the training

- (a) Identification of Carp Brooders
- (b) Brood Stock Management of Carp brooders
- (c) Nutritional Requirement of Brood Fish
- (d) Inducing Hormones for Carp
- (e) Eco- carp Hatchery
- (f) Induced Breeding
- (g) Nursery Pond Management

Date 1 December, 2018

MIDTERM REVIEW WORKSHOP AT NDUAT, KUMARGANJ, AYODHYA (30.11.2018-01.12.2018)

Proceeding of Workshop

The Mid Term workshop was inaugurated in the presence of Dr. P.K. Singh, DEAN, NDUAT Kumarganj, Ayodhya, Dr. N.K. Bajpai, Director Extension, Banda Agriculture University, Banda as representative of ATARI, Kanpur. Dr. A.P. Rao, Director Extension, NDUAT, Kumarganj, Ayodhya welcome all the dignitaries of the house and instructed to all the KVK head and incharges to work hard for achieving the target to improve the economic empowerment of farm families as per the government mandates. He has also emphasized that full support is being given from the headquarter. Dr. Gajendra Singh, Professor Agronomy, Dr. R.D. S. Yadav, Head, GPB and Er. R.C. Tiwari make aware the house about the latest developed technologies. Dr. P. K. Singh emphasize on diversification in Rice Wheat cropping system for higher return and good soil health. Dr. S. K. Singh, Head KVK, Amethi did the anchoring and vote of thanks was given by Dr. S.K. Tomar, Head, KVK, Gorakhpur.

- It has been observed that there is a need of clarity regarding the NARI project. This project is designed for the nutritional empowerment of farm families. It is therefore required to consider the holistic approach. In this context the association of the Agronomy and horticulture discipline is as important as Home Science Scientist. Action Plan for NARI should be reframed and submitted to ATARI, Kanpur directly. It was also decided that the farm families in DFI villages may be selected for the implementation of the project. Nutritionally rich crop/varieties must be given priority for cultivation in this project along with coarse and minor Millets. Proven technologies should be included in the programmes.
- Target of soil sample to be analysed and Soil Health Card to be made as per the resources. However it is very much needed to analyse the impact of Soil Health Card on the total consumption of fertilizer and the ultimate effect on the economics.
- During the presentation it has been observed that in majority, IFS has not been initiated yet; therefore the specific district wise programme for IFS should be framed. It is also essential to mention that the budget allotted for this programme could not be utilized earlier due to one or other regions and therefore the efforts of the Head Quarters level is required to reallocate the budget with ATARI, Kanpur.
- Most of the KVKs have not presented VATICA and as such a comprehensive instruction is required for preparation of the project in prescribed format.

Director Extension
A.N.D.U.A.T. Kumarganj
Ayodhya

Technical Session -

- All the KVKs have presented the Action Plan for selected DFI villages but the selected interventions are too much and in general. Therefore it is required to reconsider and prepare specific and concrete action plan and accordingly action is required on priority. It was also discussed that Head quarter will initiate the action in formulation of the proper DFI Action plan.

Director Extension

- Variety of private sectors should not be included in OFT. Varieties tested/ recommended by the university/ ICAR may be incorporated.
- In OFT photographs of control plots and improved technology should also be presented.
- The advisory services through m-Portal are also in very starting phase and therefore proper sensitization and guidance is needed for starting this effective programme.
- All the Head of KVKs have presented six months progress report and Action Plan for 2019-2020 nicely as per the instructions, however few KVKs Kushinagar, Ballia, Mau, and Maharajganj were instructed for making the proper presentation.
- It has also requested all the senior colleagues of KVKs to help other colleagues of KVKs for formulation of effective plan.
- The presentation should be strictly based on instructions received from ATARI, Kanpur.
- Most of the KVKs have not presented the present status of livestock unit which is an integral part of IFS system.
- Regarding the number of OFTs it is very clear that all scientists should formulate at least two OFTs at a time. The number of treatment selected should not be more than three and the experienced personnel of the university must be consulted for finalization of the OFT programmes.
- Some KVKs have presented their work very nicely as per instructions received i.e. KVK Basti, Gorakhpur I, Amethi, Deoria, Gonda I, Azamgarh I, Baharaich II, Jaunpur I and Mirzapur.

“Climate Change- Resistant Fisheries”

21st November, 2018

World Fisheries Day

Organized
by

College of Fisheries

A.N.D.U.A.&T.

Kumarganj, Ayodhya-224229

Uttar Pradesh

Why we celebrate World Fisheries Day

The **World Fisheries Day** is celebrated annually on 21st November, 2018 by fishing communities across the globe. It emphasizes the importance of securing sustainable fish stocks around the world. The theme of the year for celebrating the day is ‘Climate Change-Resistant Fisheries’

Who can attend?

The College of Fisheries is organizing a training programme on the occasion of **World Fisheries Day** for Technical and Non- technical staff of the university. The training will be helpful for them to understand the reason for climate change and its impact on fisheries.

Themes of the training

- (a) Climate Change: Background
- (b) Causes of Climate Change
- (b) Impact of Climate Change on Aquaculture and Fisheries
- (c) Impact of Aquaculture on Climate Change
- (d) Climate Resilient Aquaculture Technologies
